14th CAD/CAM & Digital Dentistry Conference in Dubai

In mid-April, for the 14th time, the focus will once again will be on the digital versatility of dentistry.

Dubai, UAE. On April 12 and 13, 2019, the Centre for Advanced Professional Practices (CAPP) invited dental professionals for the fourteenth time to the congress “14th CAD/CAM & Digital Dentistry Conference & Exhibition”. The congress will cover a multitude of topics in a wide range of CAD/CAM and digital dentistry.

The congress will cover topics like e.g. digital workflow for implant restorations, advanced in CAD/CAM technology, implant dentistry, chair-side CAD/CAM, digital crowns/veneers, laser dentistry, digital impressions, 3D-virtual patient, intraoral scanning and many more.

The event will once again be one step further in 2019 that board spectrum and versatility that digitalization holds for dentistry and dental technology. Numerous workshop and lectures by well-known speakers on Friday and Saturday will once again be accompanied by a comprehensive presentation of the industry.
